

# ASWIN

SOFTWARE ENGINEER

## CONTACT

+91 6380157944

aswin@aswincloud.com

Pondicherry, India

aswincloud.com

github.com/Aswincloud

linkedin.com/in/aswin4122001

## CORE SKILLS

Kernel optimization

Profiling & benchmarking

Python

C / C++

Bottleneck analysis

## LANGUAGES

Python

C++

C

Java

SQL

## TOOLING

Git

GitHub Actions

pytest

PyPI

profilers

## CLOUD & OTHER

Cloudflare — hosting, Tunnels, Zero Trust / Access; self-hosted services. PCB design, Linux & shell scripting.

Software engineer working close to the metal on next-generation AI accelerator hardware. I build and optimize low-level compute kernels, profile and benchmark tensor operations, and hunt bottlenecks across the stack to drive device throughput — and own end-to-end model tracing and validation plus the tooling and infrastructure around it.

## EXPERIENCE

### Software Engineer

MulticoreWare Pvt Ltd · Chennai, India

Jun 2023 – Present

- Software engineering for a leading AI silicon company's accelerator stack — developing and optimizing the software that runs on next-generation AI chips.
- Work as part of an element-wise operations team — contributing kernel development, code review, and CI health for unary/binary element-wise ops.
- Author and optimize low-level compute kernels with broad data-type coverage (fp32, bf16, int32, uint8/16/32) and hardware-specific instruction-level work verified against ISA documentation.
- Own end-to-end model tracing and validation with sweeps — reconstructing real model operation traces from a database and validating them against generated sweep tests for exact-match coverage.
- Profile and benchmark kernels with the device profiler, tracking kernel execution time and diagnosing per-core load imbalance to guide optimization.
- Maintain performance-tracking automation and daily/weekly reporting pipelines that flag regressions against historical baselines and correlate them to commits.

### Industrial Project Engineer

Lenovo Pvt Ltd · Pondicherry, India

Jun 2022 – May 2023

- Developed and maintained a smart attendance system using face-recognition technology with database integration.
- Built an ESD tester with database-backed logging for real-time test workflows.
- Worked on computer-vision algorithms, biometric authentication, and real-time data processing.

## PROJECTS

### ttperf — AI-Accelerator Performance Profiler

CLI tool that profiles AI-accelerator compute tests and extracts device kernel performance metrics. Wraps the device profiler with pytest, parses result CSVs, and reports total kernel duration. Published on PyPI. [Python](#) · [pytest](#) · [PyPI](#) — [ttperf.aswincloud.com](#)

### Eltwise Performance Tracker

Day-by-day performance monitoring for element-wise operations on AI-accelerator hardware — tracks kernel-timing trends across dates, correlates regressions to git commits, and sends automated alerts on >20% changes. [ttnn-eltwise-performance.aswincloud.com](#)

### Academic Projects — B.Tech ECE

Embedded & hardware builds: DDS-based portable function generator (up to 12 MHz), Arduino-based portable oscilloscope, 0–30 V / 0–2 A regulated power supply, and a non-contact AC/DC line tester.

## EDUCATION & CERTIFICATIONS

### B.Tech, Electronics & Communication Engineering

Sri Manakula Vinayagar Engineering College, Puducherry · 2019 – 2023 · CGPA 8.5 / 10

- SkillRack — 300+ medals in C & Java
- Python for Data Science — NPTEL
- Great Learning — C, Java, OS & Memory
- TCS iON — Career Edge
